

# The Connected Workplace

Passwordless, contactless, and handsfree workflows for the future-ready enterprise

# A connected workforce creates an interoperable workplace with endless use cases built on one platform.

## Passwordless access to systems

Provide access across enterprise IT systems and services with a tap of the Nymi Band™.

## Secure contactless physical access control

Grant or deny access through doors, elevators, parking areas, and other building entry points.

## Privileged access management

Use comprehensive security controls via the Nymi Connected Worker Platform to segment authorized users based on task.

## Contractor and visitor management

Issue secure, non-transferable credentials and manage visitor-restricted areas to empower employees with greater insight into guests.

## Intelligent print solutions

Allow authorized users to collect prints from centralized office resources.

## Secure remote working

Ensure security and presence of employees when work is remote.

## Smart distancing and contact tracing analytics

Implement social distancing policies with real-time feedback to ensure health and safety of workers, plus analyze logs to identify high-risk behaviors.

## Employee health and safety

Provide convenient and enjoyable tools for employees to track activities (e.g., step counter), as well as lifesaving use cases (e.g., lone worker safety).

# Passwordless, Contactless, and Handsfree Workflows for Every Process

## Geofencing\*

Grant or restrict access to certain areas based on an individual's clearance or previous locations.

\*Third-party integration (e.g., RTLS) required.

## Cafeteria and vending machine payment

Connect workers to the company's cafeteria and vending solutions with an internal secure payment process for added convenience.

## Transaction authorization

Streamline transactions with on-body controls to ensure accurate authorization in a seamless and secure manner.

## Workforce communication

Communicate with employees instantly with alerts, incident reports, and corporate updates to empower an informed workforce.

## About Nymi

Nymi has created an enterprise service that connects people to their entire workplace through one platform and wearable.

Connecting workers-as-a-Service is the safe, secure, and simple way for organizations to unlock agility, security, and scalability for the digital future.

Our diverse customer base represents some of the world's largest innovative companies and we continue to expand into critical infrastructure sectors.
